Create additional beds as part of a graduated care pathway (costings and modelling taking place on 80 beds). Supporting convalescence for individuals awaiting community support.	CIW attended Winter Planning Group 10/10/22 to discuss governance A session is arranged for 20/10/22 to understand registration requirements, particularly aimed at HB's implementing SC2H equivalents within hospital facilities. Concerns re. care home stability in some areas Additional opportunities continued to be explore. Bi-weekly meetings arranged by Delivery Unit to monitor progress	Staff shortages noted in the care home sector, may impact the ability for homes to respond to the tender invitation. Ability to source Therapy capacity (OT/Physio/Assts) Throughput of the pathway to maintain flow Capacity of GP surgery(ies) to support additional care home capacity	Refined patient cohort included within service specification for these beds. Patients moved on maintenance plans waiting for PoC, reduced reliance on therapy capacity To be considered following care home responses as to suitable geographical area – engage with NCN leads	Up to 693 patients could be supported within a 26 weeks timeframe Reduction in DTOC	Workforce constraints across all sectors may impact ability to implement model	Flow Impact - Medium A&E Impact - Very Low Community Hospital Impact - Medium
New Directions Caerphilly Continue to provide domiciliary care commissioning via complex care (inc. within current SC2H pathway)	Ongoing informal arrangement	Continued availability of provision; no risks identified through consideration	Nil required	Maintained or improved DTOC position Good person centred outcomes	High	Low additional impact as Stabilising existing capacity

Additional winter capacity within community teams Supporting the ability to offer additional hours of work to mitigate further staff shortages due to sickness/leave over the winter period (provided via overtime/ additional hours of existing staff)	Scoping underway across all localities; capacity typically needed from December to February/March	Reliant on willingness of staff	Nil available	Stabilised workforce Capacity to provide 7 day working (e.g. brokerage over the weekend)	Medium	High
reimbursement for care staff (providers only – excl. Health and Social Care care staff) Responding to the cost of living crisis and increasing number of carers leaving the profession, methodology developed to identify methods of providing equitable fuel reimbursement for care staff across the region.	Costings currently being received. LA Commissioners linking with complex care to share methodology	Mitigate ongoing staff retention issues due to the cost of living crisis within the provider sector	Not required	Stabilised workforce	High	Low-Med - stabilising existing capacity

COTE/Frailty Redesign - 8-8 CRT Model extend the operational hours for CRT rapid medical up to 8pm Monday to Friday, by Jan/Feb 23. It is proposed that by recruiting additional support now, it would be possible to make the existing CRT medical team more robust across all areas and develop a weekend response in the same timescale.	Recruitment underway for the consultant and ANP posts to support extended opening hours.	Recruitment Initiative cannot be viewed in isolation of the wider activities within the CRT	Comms and engagement across all CRTs re. the Pilot development Clear dependency map	As a 7 day model, the service could support a further 32 patients to remain at home each week, avoiding a hospital admission	Medium	Medium
COTE/Frailty Redesign - Proactive Frailty Transformation Project developing a robust method of identification and collaborative planning, admissions and GP interactions reduce. Project resource needed: • 1 WTE Band 8a programme manager • 4 medical sessions each week spilt across CRT consultant and GP	Opportunity identified within COTE/Frailty Redesign programme; activity proposed to be brought forward into winter activity to enable earlier benefits realisation (into 2023-24) Recruitment underway	Recruitment	Nil	Work with the three projects that are currently in existence and would develop the proactive frailty project in these areas.	Medium	Low

• 1 WTE Band 5 Project support officer						
COTE/Frailty Redesign: Night Time Support Develop two teams of HCSW working initially in the out of hours period 8 pm to 8am, seven days per week. Each team would consist of two Health Care Support Workers who are trained to undertake observations and provide personal care and support to people to enable them to stay safely in their own home.	Opportunity identified within COTE/Frailty Redesign programme; activity proposed to be brought forward into winter activity to enable earlier benefits realisation (into 2023-24) T&F group established, draft JD developed.	Recruitment activity having a detrimental effect on other services Incremental gains in the early stages of the programme not realising full impact within winter period	Recruitment will be for a night contract only, which will minimise the staff pool interested, and therefore less likely to impact domiciliary care market	Keeping frail and/or elderly people at home reduces dependency on longer term social care services, increasing independence and quality of life.	Medium	Low
